THE MOODY BLUES

"It is a travesty that The Moody Blues are yet to be inducted into The Music Hall Of Fame - an absolute travesty!"

Keith Altham

Since their conception, The Moody Blues have sold over 55 million records. This is the unheard story of one of the most successful progressive rock bands in history.

Experience the very best of the Moodies music right back to the genesis of the 1964 classic album *Days Of Future Passed*. We take you inside the workings of some of the most adventurous recordings to date with the unparalleled insights of the men who worked with the band. These include Derek Varnals, the engineer who mixed all but one of the 'Classic Seven' Moody albums, Tony Clarke, producer of the Moody Blues between 1966-79 (as well as so many other bands) who takes us back in time through the money and the madness, and Keith Altham, who was possibly the world's most successful independent rock agent - this man is unafraid to tell the whole truth and nothing but.

Through a combination of outstanding performance footage and a first class team of critics and commentators with inside knowledge, fuel for yourself the magic of The Moody Blues.

THE DVD FEATURES HIGHLIGHTS FROM:

- Go Now • Tuesday Afternoon • Nights In White Satin • Question • Oxygene
- Blue Guitar • Are You Sitting Comfortably and Warm...
